or

phone: +49 208 693 2425

For n-butyric acid and isobutyric acid container and chassis must be flush with one another at the rear to allow for access to the rear bottom valve.

Please note that we will only accept tank containers for loading when these have a flush positioning on the chassis or the chassis has an easy access to the bottom outlets.

For safety reasons drivers must have adequate language skills in either English or German, otherwise access to the site might be denied.

Drivers are obliged to wear protective clothing for the time being at the loading station. Protective clothing includes body-covering clothing, safety shoes, protective helmet and safety goggles.

Attention - Legal requirement on winter tires!

During Cold season, the plant may only be entered with winter tires. Controls are carried out from Nov. 1st to March 15th and it may lead to rejections in case of non-compliance, regardless of weather conditions.

Please note that we don't apply to ADR 1.1.3.6 – "1000-Punkte-Regelung".

Please also note the additional requirements for this site available on www.chemicals.oq.com.

**Important information referring to required loading times at all OQ loading locations**

Unless otherwise agreed, all OQ loading locations require the following free loading times:

3 hours for regular loads (one product, one compartment vehicle)

5 hours for multi-compartment vehicles loading more than one product

3 hours per loading location for multi-compartment vehicles loading in different loading locations (e.g. loading one product in Oberhausen and one product in Marl)

For additional waiting time caused by OQ we will reimburse up to € 50,- per hour against a valid proof. Waiting time occurred due to lack of timeslot booking won't be reimbursed.
